

*Families share*

LOVE,

LAUGHTER, &

BREAST CANCER.

**McLaren**

BAY REGION

# Like Mother, Like Daughter, Like Grandmother

You have your mother's eyes. Your daughter has your smile.

Families share traits, unfortunately including breast cancer. The most at-risk?  
*Women ages 50 and older and those with family history.*

Do you have a blood relative who has had breast cancer? Have you had an abnormal breast biopsy? Does cancer run in your family?

If you can answer yes to any of these questions, please call or visit  
**[www.mclaren.org/baybreast](http://www.mclaren.org/baybreast)** and schedule your appointment to assess  
YOUR lifetime risk of breast cancer.

Don't wait...knowing your risk could save your life. Families share love, laughter, and breast cancer.

**Tari S. Stull, MD, FACS**

*Breast Surgery*

The only fellowship trained breast surgeon in the Great Lakes Bay Region
